

Fund Brief

The objective of Ocram Fund is to generate a minimum monthly return of 3% while continuing to maximize monthly performance*

**Compounding to a 42.57% annual return*

About the Fund Manager

- Founded by Carmelo M. Calascibetta, a seasoned wealth manager.
- Calascibetta strives to be one of the most recognized and sought-after fund managers in the world. He has learned from veteran fund managers and continues to prove his highly efficient investment philosophies.
- Calascibetta is so confident in his proven strategies that he has personally invested the majority of his liquid net worth into the fund.

Specialization

- Energy, precious metals, and American indexes (i.e., NASDAQ 100, S&P 500).
- Ocram engages in tactical asset allocation exploiting strong global market opportunities with appropriate risk.

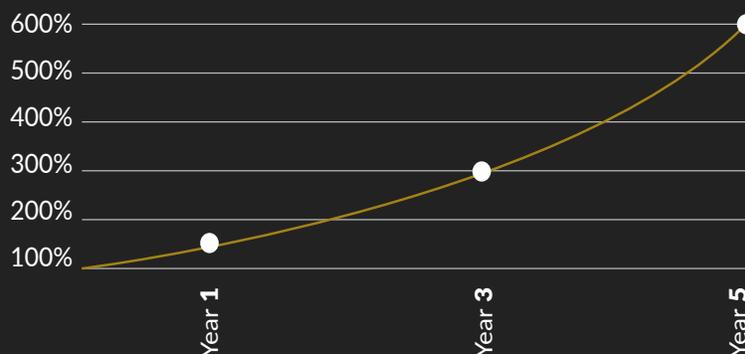

Ocram Fund offers a professional weekly analysis. This includes a thorough review of all major markets that the fund is currently speculating for all investors to utilize.

Basic Philosophy

Efficiency first. Ocram exits its positions if a substantial return occurs far sooner than expected. From there, the fund starts a position in another asset with fresh potential. The maximum risk/return ratio is always achieved this way.

Example: Ocram predicts stock X will go from \$50 to \$80 in a month. If stock X gets to \$70 in one week, Ocram will lock in a 40% return rather than wait another three weeks to hit the \$80 target. This capital is then rolled over into stock Y where it is expected to go from \$35 to \$60 within 3 weeks.

Projected 5-Year Cumulative Return

\$1M contribution is estimated to grow to:

- \$1,425,760.00 in 1 year
- \$2,898,280.00 in 3 years
- \$5,891,600.00 in 5 years
